

RESPONDING TO CLIMATE CHANGE: REALITY, ACTION, AND HOPE

A SUNY Fredonia Convocation Series Event

Tuesday, October 22 at 7 pm

in the Kelly Auditorium (Room 105, Science Center)

"Where We Are"

The verifiable facts of anthropogenic climate change, including recent data and trends

"What to Do"

Actions that may be most effective in addressing anthropogenic climate change

"Reason for Hope"

Encouraging developments, both technological and political, that suggest that solutions are within our reach

Jim D'Aloisio, a practicing structural and building envelope engineer, is Chair of the Structural Engineering Institute's (SEI) Climate Action Team, former Chair of the SEI Sustainability Committee, and former Chair of USGBC NY Upstate Chapter, former USGBC National Board Member. He is an Al Gore-trained Climate Reality presenter, and is involved with the Central NY Chapter of Citizens' Climate Lobby. His passion is developing and sharing strategies to reduce carbon emissions from the construction and operation of buildings.

He has written over 20 articles and papers on climate change awareness and action and has developed and presented hundreds of times across the country, including several day-long workshops on Climate Action for Engineers. Jim considers himself a "conditional optimist." He lives in DeWitt, NY.
